2022 Cytolopathology Laboratory Enrolment Form

Program Amendments:

- The Non-gynaecological Specialty program will consist of thyroid samples in 2022. This program will also include a retrospective thyroid reporting category audit which will open in February and close with the Non-gynaecological Specialty program. Further information regarding this audit will be distributed as it becomes available.
- The Technical program will be a cell block processing exercise.
- Australian laboratories will be assessed on Cervical Screening Result. Further information regarding this change will be distributed to participants as it becomes available.
